Profile

Sportradar Integrity Services are the world's leading supplier of monitoring, intelligence and prevention solutions to sports federations, leagues, clubs and state authorities to support them in the fight against betting-related match-fixing.

With over 12 years of experience, the Integrity Services have established themselves as the world's foremost experts in the area of sports integrity, betting-related fraud and match manipulation. Having started as a service provider and consultant to the sport rights holder world, today we offer a whole suite of tools and services for state authorities and law enforcement agencies as well.

Counting some of the leading sport rights holders as our partners, including FIFA, UEFA, AFC, CONMEBOL, IIHF, NHL, NBA and ICC, we monitor odds movements and patterns worldwide to identify suspicious activities through our unique *Fraud Detection System (FDS)*. The Reports generated by our FDS provide a data-driven and accurate insight into the markets on particular matches and have been used as part of sports disciplinary procedures as well as criminal investigations and prosecutions.

The Integrity Services also include the *Fraud Prevention Service (FPS)* through which we offer education tools and services that have been delivered to federations, leagues and clubs around the world. These have raised awareness and understanding of illegal betting and match-fixing among those involved in sport.
